

Dinosaurs Demonstrate a Young Earth

* Notice that there are four separate videos in this lesson

1. [Click Here for first video \("60 Minutes" Segment\)](#) --> [scientific community attack and deny dinosaur soft tissue and blood vessels findings](#)

2. [Click Here for second Video](#)--> [DinoSummary Earth is YOUNG](#)

- ★ 0:49 The greatest discovery in the history of paleontology
- ★ 1:45 "60 Minutes" Program on the Soft Tissue Discovery that Brought it to Public Attention
- ★ 4:27 Soft Tissue from Triceratops Horn
- ★ 5:06 Carbon 14 in dinosaur fossils indicates ages far less than 1 million years
- ★ 7:39 Original biological materials from dinosaurs is being dated by standard Carbon 14 methods in the tens of thousands of years range.
- ★ 21:37 The Reaction of the Scientific Community to the Discovery of Dinosaur Biological Material
- ★ 22:02 530 Million Year Old Precambrian Biological Tissue - Journal of Paleontology 2014
- ★ 23:19 Decalcified Triceratops Bone
- ★ 25:06 Soft Tissue Under a Microscope
- ★ 26:00 Why the iron preservation explanation of the immense ages of soft tissue is untenable

3. [Click Here for third video](#) --> [Extraordinary Evidence that Dinosaurs Lived with Man - Dr. Don Patton \(The Record of the Rocks\)](#)

- ★ 0:00 PART ONE
- ★ 1:27 Sedimentary Rock Average of 1.5 miles of sedimentary rock (water deposited) cover the continents containing multiple billions of fossils
- ★ 2:17 Evolutionary Explanation
- ★ 2:41 Geologic Time Scale / Geologic Column Progression Recorded Over Millions of Years (exists only in textbooks -- not found complete anywhere on earth)
- ★ 4:47 How is the Geologic Column Correlated and Constructed? Is it circular reasoning?
- ★ 6:36 Clams, Clams, and More Clams. . . 95% of fossil record is marine invertebrates Only a small fraction of 1% of the fossil record is vertebrates
- ★ 8:04 Father of Stratigraphy Nicolas Steno: 1638 - 1686
- ★ 10:15 The Genesis Flood - Whitcomb and Morris The facts of geology fit this interpretation
- ★ 13:29 The Geological Column as a Useful Model
- ★ 14:11 How Do We Test the Evolutionary Model? Topsy-Turvy Fossils
- ★ 14:58 Living Fossils
- ★ 15:41 Coelacanth
- ★ 17:18 Topsy Fossil - The Problem of Extinction
- ★ 18:11 The Turvy Fossils - What Evolutionists Would Consider a Real Test
- ★ 18:40 Richard Dawkins - Well-verified human fossils found in pre-mammalian rocks would falsify evolution

- ★ 20:09 Malachite Man
- ★ 22:47 Human Footprints in Dinosaur Strata?
- ★ 24:49 Burdick Track
- ★ 25:25 Identified by Dallas Crime Lab as human footprint
- ★ 25:38 Erosion or Carved?
- ★ 25:59 Stan Taylor's work in the 1970's
- ★ 26:49 Glen Kuban's explanation wins Humanist of the Year award - "eroded dinosaur tracks"
- ★ 27:24 Does the eroded dinosaur tracks explanation work?
- ★ 28:14 The track that really persuaded Dr. Patton
- ★ 30:22 Right-left alternating footprints for 14 steps
- ★ 30:47 Photo of all fourteen tracks in sequence crossing dinosaur tracks
- ★ 31:54 Taylor Trail Analysis
- ★ 33:41 The Way You Do Science "The Perfect Turvy Fossil"
- ★ 34:07 Dinosaurs with Human Feet?
- ★ 35:26 Alien Footprints?
- ★ 37:08 PART TWO
- ★ 37:21 You Need More Evidence
- ★ 37:55 River pumped dry in 2000 to search for more evidence
- ★ 38:16 Longest consecutive dinosaur trail on the American continent uncovered
- ★ 39:30 You Need More Evidence
- ★ 39:37 The McFall Trail Fifteen different consecutive right-left human tracks with one stepping into a dinosaur track
- ★ 41:12 The Burdick Track Examined
- ★ 44:17 Large Cat Track
- ★ 44:56 Sonora, Texas Nine right-left human footprints
- ★ 45:11 Stinnett, Texas Permian rock
- ★ 46:20 New Mexico Human Track - Permian
- ★ 47:13 Turkmenistan
- ★ 48:51 Finger Fossil?
- ★ 49:57 Near London, Texas Cretaceous hammer
- ★ 51:03 Oklahoma - Iron Pot in Coal
- ★ 51:34 North Carolina - Bell in Coal 295 million years old?
- ★ 52:11 Utah - Petroglyphs
- ★ 53:12 Colorado - Three-horned Dinosaur
- ★ 53:30 Grand Canyon - Allosaurus similarity
- ★ 54:05 Peru - Inca Burial Stones, Cloths, other Pottery, Death Masks
- ★ 58:20 Mexico - Ceramic Dinosaur Figurines
- ★ 1:00:10 Cambodia - Khmer Empire Temple

[4. Click Here for fourth Video --> Dinosaur Soft Tissue: Preserved by Iron? - Kevin Anderson](#)

- ★ 0:01 The Iron Model - The most popular evolutionary explanation for the preservation of biological material over multiple tens of millions of years
- ★ 0:23 Amber is not sufficient to preserve DNA. Why would something less adequate work?
- ★ 0:51 How iron stabilization is thought to preserve biological material
- ★ 1:42 Fenton Chemistry
- ★ 2:33 Free radicals form cross-link proteins.
- ★ 3:34 How was this model of preservation tested?
- ★ 5:11 Why the color factor is questionable in this study
- ★ 6:07 Electron microscope photos were published separate from the experiment article in an online supplement.
- ★ 7:50 Why not more detailed analysis of the actual preservation of the tissue?
- ★ 9:06 Challenges to Iron Preservation Model * 2 years at constant temperature does not extrapolate to 65 million years (or more) at fluctuating temperature * Study admitted insufficient release of iron from cells (a blender was used to release more iron). * Most Dino remains are disarticulated and scattered -- separated from most of the blood source * Not enough iron in the blood - an external source?

- ★ 10:33 What about the 500 million-year-old beard worms and sponges with preserved soft material that have no blood?
- ★ 11:27 If this iron mechanism was the actual method of preservation it would leave chemical indications.
- ★ 13:57 Radiation absorbed by bones would destroy biological material if it were longer than thousands of years.
- ★ 15:09 What is a more consistent way to account for biomolecule preservation?
- ★ 15:20 If the fossils are young (thousands not tens of millions years old) everything fits with the observed facts.
